<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/701,953	GYURE ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Manuel Mendez	3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 22 February 2005.

2a) This action is FINAL.                    2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

4) Claim(s) 21-29 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) Claim(s) \_\_\_\_\_ is/are allowed.

6) Claim(s) 21-29 is/are rejected.

7) Claim(s) \_\_\_\_\_ is/are objected to.

8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All    b) Some \* c) None of:

1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

1) <input type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____.
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date _____.	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____.

## DETAILED ACTION

### ***Response to Arguments***

Applicant's arguments filed February 22, 2005 have been fully considered but they are not persuasive. A closer look at figure 1 (below) shows a lubricant (20) disposed over a limited area of at least one portion of the inner surface of the tubular barrel. Applicant correctly argues that the lubrication between the inner wall of the cylindrical body (10) and the plunger (15) is provided by the resilient material (20) on the plunger (15). However, when the plunger is inserted in the barrel, as shown in figure 1, the resulting structural combination is a lubricant disposed over a limited area of at least one portion of the inner surface of the tubular barrel. The pending independent claim does not disclose any structural limitations establishing a relationship between the stopper and the lubricant in the barrel. Since the only disclosed relationship is between the lubricant and the barrel, it is concluded that the pending rejections are proper and will be maintained.

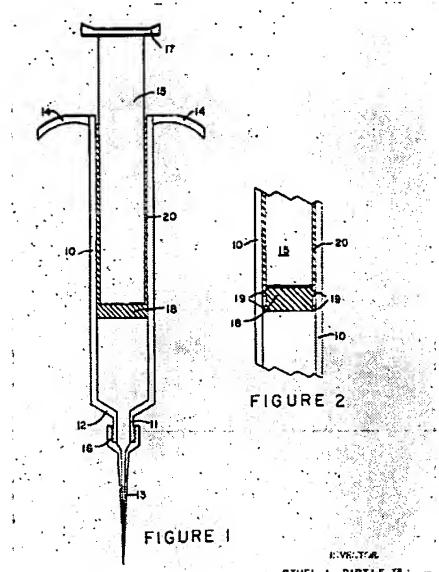

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 21, 22, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Pirtle, Jr.**

In figures 1 and 2, the cited patent shows a tubular barrel having a first opening and a second opening at opposite ends with a wall extending between the ends, the wall having an inner surface, a stopper slidably received in the tubular barrel and having a portion in slidable engagement with the inner surface of the tubular barrel, and a lubricant disposed over a limited area of at least one portion of the inner surface of the tubular barrel, the inner surface portion having an axial length greater than an axial length of the stopper. Please note above that the length of coating (20) is greater than the length of stopper (18).

In relation to claims 22 and 23, the lubricant (20) extends along a distance that is less than an entire length of the inner surface, and moreover, the second opening is an outlet.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 24-29** are rejected under 35 U.S.C. 103(a) as being unpatentable over Pirtle, Jr., in view of Funderburk, Richard, et al., Akhavi and Tischinger. The Pirtle, Jr., Patent does not expressly disclose the conventionality of (1) plastic syringes, (2) glass syringes, (3) and the use of silicone to provide a coating to the inner wall of the syringe. However, the above-disclosed enhancements are conventional as evidenced by the teachings of Richard, et al., Akhavi and Tischinger.

The Richard, et al., Patent demonstrates that the use of glass to manufacture syringes is conventional in the art. Additionally, the Akhavi Patent teaches that plastic syringes are also conventional in the art. Finally, the Tischlinger Patent demonstrates that it is well known in the art to use silicone as a lubricant in syringes. Based on the teachings of the above-cited references, a person of ordinary skill in the art would have considered (1) plastic syringes, (2) glass syringes, (3) and the use of silicone to provide a coating obvious design choices.

Finally, the examiner of record want to point out, that Funderburk teaches a system for lubricating a syringe barrel. Funderburk, however, does not teach that the lubrication should be limited to selected portions of the syringe. Importantly, Pirtle, Jr.,

Art Unit: 3763

demonstrates that it is conventional to lubricate only a portion of the syringe barrel. Moreover, in figure 2, as the plunger moves up and down, it is apparently clear that sealing rings (19) would be lubricated to reduce friction and enhance the movement of the plunger. Based on the above observations, a person of ordinary skill in the art would have considered the step of coating the sealing rings of the stopper an obvious design alternative.

***Conclusion***

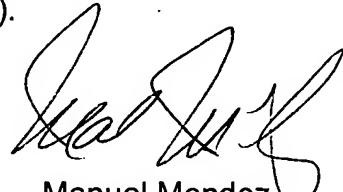

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Brian Casler can be reached on 703-308-3552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
